

Irene Llorca

Irene Llorca studied Agronomic Engineering (with a focus on food industries) at Universidad Politécnica de Valencia/Spain and holds a master degree in Food Science and Technology from the University of Gent and Catholic University of Leuven/Belgium.

Nowadays, she works as a project manager and researcher at Ainia Technological Centre in the Quality, Food Safety and Environmental Department and the focus of her activities is on food safety and hygiene in the food industry. Further, she is responsible for the hygiene experimental facilities of Ainia.

Irene Llorca is involved in R+D+I projects as well as in training, technical assistance and management systems on food safety (HACCP, BRC, IFS, ISO22000, etc.). She works especially in the fields of hygienic design of equipment and facilities, validation and improvement of the eco efficiency of the cleaning and disinfection process as well as on advanced oxidation technologies.

Further, Ms. Llorca is co-responsible for the accredited test laboratory at Ainia for the examination and EHEDG certification of equipment and she is a member of the EHEDG Subgroups 'Training & Education' and 'Test Methods'.
