

Authorised Trainer

Martin Alvarez

Martin holds a degree in Food Engineering (Honors), with post-graduate studies on simulation & control and numerical methods for design in engineering.

He spent 18 years in the brewing and beverage (soft-drinks and water) industries, both at technical (Subject Matter Expert) and managerial positions working in many different countries in South America. He's been involved in many engineering projects involving food safety issues related to facilities, equipment and processes' design and commissioning.

Since 2017 he's been a partner of bect Ltda. working as its Executive Director, focusing on consulting and training on hygienic engineering & risk assessment, cleaning and sanitation, food process optimization, computational fluid dynamics and cleaning validation.

He's been trained as a welding technician for TIG/GTAW process, and currently a member of the American Welding Society (AWS).

A member of the International Association for Food Protection (IAFP), he's an active member (Observer) for many Working Groups at 3-A Sanitary Standards.
