

Kazuhiro Nakanishi

Dr.-Eng.

Kazuhiro Nakanishi studied at Dept. of Chemical Engineering, Fac. of Engineering, Kyoto University, Japan, 1954-1972. After graduation, he became Instructor and subsequently associate professor at Dept. of Food Science and Technology, Fac. of Agriculture.

From 1982 to 1984, he stayed at the chair for Food Process Engineering and Dairy Technology, T. U. Munich, Weihen-stephan and worked with cleaning mechanism of UF membranes fouled with milk, under Prof. H. G. Kessler. Since then, he has a great interest, particularly in cleaning problems of food manufacturing processes.

In 1987, he moved to a newly build Dept. of Bioscience and Biotechnology, Fac. Engineering, Okayama Univ., and retired in 2011. After retirement Okayama Univ., he taught in College of Bioscience and Biotechnology, Chubu Univ., 2011-2016.

He is a core member of EHEDG Japan, and since 2017 a member of the EHEDG. In Sept. 2018, he was certificated as an EHEDG authorized trainer.
