

Nathan Mirdamadi

Global Director of Sanitation
Kerry

Nathan serves as the Global Director of Sanitation at Kerry, he leads the strategic direction and execution of the sanitation programs across nearly 140 manufacturing sites, encompassing a diverse portfolio of products and technologies. With nearly 30 years of food industry leadership experience, Nathan's career spans various functions, including sanitation, operations management, and corporate finance.

He is a frequent contributor at industry events and supports several associations through membership, presentations and thought leadership including leadership within International Association for Food Protection (IAFP), board of directors with Food Allergy Research and Resource Program (FARRP) and the advisory board for European Hygienic Engineering and Design Group (EHEDG).

He is a founding member a recently formed industry focused group looking at pragmatic research of dry cleaning and sanitation, Cornell Dry Sanitation Research Advisory Council. He is also the recipient of the 2025 IAFP Sanitarian Award.

Nathan holds a Master of Science in Food Safety from Michigan State University, MBA from California State University, and Bachelor of Science in Economics & Finance from Missouri Southern State University.

Nathan, his wife and 2 children live in Joplin, Missouri where they stay active with youth sports (mostly baseball), Brazilian jiu-jitsu and their church. They have a uniquely diverse household as they embrace his ½ Persian ethnicity while being a bilingual (Spanish) home.
