

**EHEDG NZ Committee Member Profile**

**Name:** Greg Dixon  
**Company:** Ecolab  
**Position:** Technical Support Specialist (Food & Beverage Division)  
**Location:** Hamilton  
**Committee Role:** Treasurer (Hygiene Service Sector)

**Biography:**

Greg has worked in the NZ Food Industry for over 35 years with both hands-on manufacturing experience and hygiene program development and delivery. Greg has a Diploma in Dairy Technology from Massey University.

His manufacturing experience has been dedicated to the Dairy Industry in NZ. During that time, he gained expertise in process operations and technologies for cream products, whey-based products and value-added powder products. He has extensive experience with running, troubleshooting and

managing membrane filtration systems for dairy operations.

In 1995, Greg joined Ecolab, as an Account Manager for the Food & Beverage Division, focusing primarily on the dairy sector. His extensive practical knowledge of running CIP systems as well as general open plant cleaning in critical hygiene areas was a valuable asset to the business.

From day to day individual account management of cleaning and sanitation needs across the dairy, beverage and other food businesses, he moved into a Business & Market Development role for the Ecolab F&B Division and then to Engineering Manager for the NZ Business. In 2013 he moved to his current role of Technical Support Specialist for the Ecolab Australia & New Zealand businesses. This role involves the transfer of new hygiene technology to the Food Industry, new program development and trial of novel applications, cleaning and sanitation training for both customers and Ecolab Account Managers and troubleshooting hygiene issues that arise.

In this capacity Greg brings a wealth of skills and current knowledge to EHEDG New Zealand. February 2020
