

Satoshi Fukuzaki

Satoshi Fukuzaki was born in Hiroshima/Japan and educated in Hiroshima University and graduated in 1991 as Doctor of Engineering.

Since 1991, he started to investigate the mode of adsorption of food ingredients to solid surfaces and the cleanability of food-processing equipment at the Industrial Technology Center of Okayama (ITCO). At ITCO, He has pursued academic study on cleaning and disinfecting operations and lectures about hygienic management in food manufacturing settings for 22 years.

Since 2013, he is professor in Mie University/Japan. Over the past 27 years, He has published academic papers concerning cleaning technology more than 90 and pursued lectures more than 2 hundred. For recent 2 years, I have given lectures at EHEDG advanced training course in JAPAN.
